

LSH CADENCE IN COLOR

Benji (4), Montego (5) and Marigold (6). She is now competing them in dressage, pairs driving and team driving. "These horses are all eager to please, athletic, smart, forward and easy to ride," says Thornton. "I love seeing them perform together. Their golden color against the green grass makes for great eye candy."

Dressage: LSH Cadence In Color

A flashy 14-year-old American Warmblood stallion, Friesian/warmblood cross Cadence made his entrance into Grand Prix dressage in 2011. "When he started at Prix St. Georges, the judge was quite impressed with Cadence's power and ability to sit and collect," says owner Michele Dodge. "He showed a strong talent for upper-level movements such as piaffe, passage and pirouettes, and has the thrust for powerful extended gaits."

Turning heads with his elegant carriage and splashy pinto markings, Cadence reached the Grand Prix level after training and showing for only

five years. "Judges and bystanders always ask about his breeding," says Dodge. "He is a good ambassador for the American Warmblood Society."

Among his many achievements, Cadence has been the AWS/USDF Champion or Reserve Champion at Second Level, Third Level, Prix St. Georges and Intermediare 1, and was the AWS Regional Champion Dressage Horse at Prix St. Georges. He is a very intelligent stallion and learns quickly, according to Dodge. Cadence can also perform movements like the Spanish walk.

These horses' qualities and athletic achievements speak volumes: The American Warmblood has a lot to offer the competitive rider.

NOT ALL SENIOR HORSES LOSE THEIR *Giddy up.*

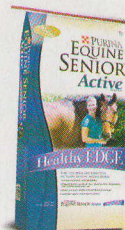

Nobody cares more about senior horse nutrition than Purina®. And based on our 17 years of senior horse research and on-farm studies, we've discovered that, like humans, horses age at dramatically

different rates. That's why our experts have developed two distinctive senior feeds, to keep aging horses healthy and happy.

Equine Senior® horse feed

- 100% of required nutritional needs, including built-in forage and beet pulp
- Easy Soak™ pellet technology makes chewing less difficult for your horse
- Contains our patented Amplify® Nugget, which includes rice bran, flax seed and vegetable oil
- For horses that need more calories from fat and less from sugar, providing a diet lower in nonstructural carbohydrates that may help aging horses with difficulty managing blood sugar levels

And now we've taken our expertise in senior horse nutrition and applied it to the active senior horse.

Equine Senior® Active Healthy Edge® horse feed

- For horses with good dental and digestive health — to be fed with hay or pasture
- Nutritionally balanced and designed for active aging horses, with added fat and fiber, and a controlled starch and sugar formula
- Contains our patented Amplify® Nugget, which includes rice bran, flax seed and vegetable oil

Find out which senior feed is right for your horse and get \$10 off at www.activestill.com.
